81. **E. NOTICE REGARDING AIRPORT ZONING REGULATIONS:** The property may be in or near an airport safety zone
82. with zoning regulations adopted by the governing body that may affect the property. Such zoning regulations are
83. filed with the county recorder in each county where the zoned area is located. If you would like to determine if such
84. zoning regulations affect the property, you should contact the county recorder where the zoned area is located.

86. Property located at 11711 Bradford Road, Minnetonka, MN 55343
87. **F. NOTICE REGARDING CARBON MONOXIDE DETECTORS:**
88. MN Statute 299F.51 requires Carbon Monoxide Detectors to be located within ten (10) feet from all sleeping
89. rooms. Carbon Monoxide Detectors may or may not be personal property and may or may not be included in the
90. sale of the home.
91. **G. WATER INTRUSION AND MOLD GROWTH:** Recent studies have shown that various forms of water intrusion
92. affect many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture
93. leaving the home.
94. Examples of exterior moisture sources may be
95. • improper flashing around windows and doors,
96. • improper grading,
97. • flooding,
98. • roof leaks.
99. Examples of interior moisture sources may be
100. • plumbing leaks,
101. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
102. • overflow from tubs, sinks or toilets,
103. • firewood stored indoors,
104. • humidifier use,
105. • inadequate venting of kitchen and bath humidity,
106. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
107. • line-drying laundry indoors,
108. • houseplants—watering them can generate large amounts of moisture.
109. In addition to the possible structural damage water intrusion may do to the property, water intrusion may also result
110. in the growth of mold, mildew and other fungi. Mold growth may also cause structural damage to the property.
111. Therefore, it is very important to detect and remediate water intrusion problems.
112. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to humans.
113. However, molds have the ability to produce mycotoxins that may have a potential to cause serious health problems,
114. particularly in some immunocompromised individuals and people who have asthma or allergies to mold.
115. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
116. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having
117. the property inspected for moisture problems before entering into a purchase agreement or as a condition of your
118. purchase agreement. Such an analysis is particularly advisable if you observe staining or any musty odors on the
119. property.
120. For additional information about water intrusion, indoor air quality, moisture or mold issues, please view the
